EXPERIENCE

Full Stack Developer – Brahmin Spacetechn Pvt. Ltd. (IIT Kanpur)

Dec 2025 – Feb 2026

- Developed the company's official website using React and TypeScript.
- Worked on backend integration and configured middleware to handle and process requests.
- Managed and maintained the live website and worked with the team on deployments as a team member, coordinating with the founders on accurate product and team content.

PROJECTS

RepoX – AI-Powered GitHub Repository Analyzer & Coding Agent

[Live Demo](#)

React.js, Node.js, Express.js, MongoDB, GitHub API, LLMs, Docker, Redis

- Built an AI agent that analyzes repositories for dependency, code-quality, security, testing and documentation issues, combining static analysis with LLM reasoning to generate actionable fixes.
- Automated the analyze, fix, test and pull-request workflow via the GitHub API, running generated code in Docker sandboxes with Redis-backed background jobs and validation checks.
- Built five analysis engines (dependencies, secret scanning, ESLint code quality, test coverage, documentation) that produce a 0-100 health score with severity grading on a React dashboard, backed by an Express.js and MongoDB API.

EDUGEN – AI-Powered Quiz & Question Generator

[GitHub](#)

Python, Flask, PyTorch, Hugging Face Transformers (T5), PyPDF2, JavaScript

- Built a Flask web app that turns text and multi-page PDFs into quizzes and 4-option MCQs using a T5 question-generation model.
- Implemented PDF text extraction, answer candidate detection, distractor generation and a highlight tool to generate questions on a chosen keyword.
- Added an interactive quiz mode with instant scoring, PDF/Markdown/JSON export and automated unit tests.

AI-Powered Network Packet Sniffer & Anomaly Detection System

[GitHub](#)

Python, Scapy, Scikit-learn, NumPy, LLM API

- Built a real-time network traffic monitor in Python (Scapy) capturing Ethernet, IPv4, TCP, UDP and ICMP packets and extracting features such as IP/MAC addresses, ports, packet sizes, protocols and TCP flags.
- Trained an unsupervised model (Isolation Forest) for anomaly detection without labelled attack data, and used an LLM API to turn detected anomalies into plain-English alerts.

TECHNICAL SKILLS

Generative AI: LLMs, RAG, LLM API Integration, AI Agents, Prompt Engineering

Languages: Python, JavaScript, TypeScript, C++, SQL

Frontend: React.js, TypeScript

Backend & Databases: Node.js, Express.js, Flask, REST APIs, Middleware, MongoDB, MySQL

Tools: Git, GitHub, Docker, Redis, Postman, Scapy, Vercel

Core CS: DSA, OOP, DBMS, Operating Systems

ACHIEVEMENTS

- Solved 300+ DSA problems on LeetCode; Top 10 student in Class X and XII; NCC "A" Certificate.

PROFESSIONAL SUMMARY

Computer Science undergraduate (B.Tech, 2027) seeking an AI/ML Internship. Built an unsupervised ML system for network anomaly detection and an LLM-powered AI agent that automates code analysis, fixes and pull requests. Skilled in Python, NumPy, RAG and LLM API integration, with full-stack experience (React.js, Node.js, MongoDB) to deliver end-to-end AI applications.

EDUCATION

Jaypee University of Engineering and Technology, Guna

2023 – 2027

B.Tech – Computer Science and Engineering

Excellence Hr. Sec. School, Madhya Pradesh

2022

Class XII (MP Board) – 80.2%

Excellence Hr. Sec. School, Madhya Pradesh

2020

Class X (MP Board) – 94.5%
